

# Solar Redefined

Now, you have a choice for a 2-in-1, Solar Roof that goes beyond roofs of the past. Discover how SunTegra is giving new meaning to roof performance.

Regular solar panels sit on bulky metal racks above your roof... **SunTegra *is* your roof.** The modern solar roof solution provides customers a **durable roof** and an **attractive solar electric system**, all-in-one.

The SunTegra solution for asphalt shingle and concrete tile roofs offers the perfect combination of aesthetics, economics, performance and value!

Speak with your local Authorized SunTegra Dealer today to explore how SunTegra can benefit your home!

City **Stamford, CT** | System Size **5.8 kW** | Roof Area Savings **425 ft<sup>2</sup>** | Energy Offset **50%**  
**Dream Home with Solar Aesthetics** The energy-conscious homeowners sought a solar solution that would blend in with the look and feel of their beautiful new waterfront home. Also, as electric vehicle drivers, they wanted to maximize their solar production. SunTegra was a perfect fit!

City **Sea Isle City, NJ** | System Size **8.6 kW**  
Roof Area Savings **650 ft<sup>2</sup>** | Energy Offset **80%**

**The Importance of Curb-Appeal** This family always wanted to install solar energy, but living on a main street, they were worried about the aesthetics of bulky solar panels and the value of their home. Once they found the integrated SunTegra Solar Roof, it was a no-brainer to go solar in style!

City **London, Ontario** | System Size **4.8 kW**  
Roof Area Savings **375 ft<sup>2</sup>** | Energy Offset **50%**

**New Roof? Make it a Solar Roof** When these homebuilders decided to incorporate solar into their model home, they needed something that would look good and protect the home during those tough winter months; they achieved both with the low-profile, durable SunTegra Solar Roof.

City **Austin, TX** | System Size **7.6 kW** | Roof Area Savings **515 ft<sup>2</sup>** | Energy Offset **105%**

**Low-Profile Retrofit** For homeowners that spend much of their time in their backyard planting and harvesting their garden, they wanted a solar solution that would blend in with their roofline. The low-profile, sleek, built-in look of the SunTegra Solar Roof offered this couple exactly what they were looking for in a solar roofing product. On top of aesthetics, they will produce enough solar power to offset all of their energy use over 12 months! Amazing!

City **Derby, CT** | System Size **4.8 kW**  
Roof Area Savings **375 ft<sup>2</sup>** | Energy Offset **100%**

**Energy Efficiency and Solar Power** This high-energy efficiency home is called "net zero", which means it has been designed with a SunTegra Solar Roof that will power 100% of the home's energy use over a 12 month period...impressive! Now *this* is the energy smart home of the future!
